SUMMARY

- 2+ years of Data Analyst experience leveraging SQL, MSBI (SSIS), Python, Power BI, and Microsoft Fabric, with expertise in applying design thinking to develop efficient and innovative data solutions
- Over 7 years of experience in regulatory reporting (finance and accounting) covering development and testing, with expertise in Oracle, MS SQL Server, documentation, test strategy design, and test case development
- Experienced in data transformation and cleaning, applying data engineering techniques to efficiently process complex regulatory reporting datasets for Middle East clients, reducing manual work by 30%
- Skilled in delivering impactful presentations to technical and non-technical stakeholders, troubleshooting analytics solutions for North American clients using tools such as Jira and Confluence, and driving a \$1M revenue increase

SKILLS

- **Cloud:** Databricks, Microsoft Fabric
- **Data Processing:** Oracle, MS SQL Server, MS Office
- **Programming:** Python, MSBI (SSIS)
- **Visualization Tools:** MS Power BI, Google Looker

ACCOMPLISHMENT

- Earned Spot Awards at Macquarie Global Services in Q3 2022 and Q2 2023 for exceptional analytical thinking, impactful storytelling through Power BI presentations, and enhancing reporting accuracy by 30%
- Received the Maverick Manager Award at Moody's Analytics in Q1 2020 for project management with agility and delivering data-driven strategies that generated \$1–2M in cost savings
- Recognized with the Create Confidence Award (Q4 2018) and the Extra Miler Award (Q4 2016) for demonstrating critical and creative thinking, strong problem solving skills, and reducing delivery time by 15%

PROJECT

Project: Material Requirements Planning Dashboard

Tilray Brands, Data Analyst

- Developed interactive Power BI dashboards featuring key performance indicators (KPIs), improving data accessibility and supporting informed decision-making for demand planning stakeholders
- Collaborated closely with business and IT teams to gather data requirements, develop robust data models, and ensure seamless integration of real-time Key Risk Indicator (KRI) metrics within Power BI
- Developed a Power Automate solution to export data from Power BI into CSV files using DAX queries, enabling automated handling of 150K+ rows of data and streamlining data import processes

Project: Key Risk Indicator Analytics Dashboard

Macquarie Global Services, Power BI Developer

- Transformed MS PowerPoint visualizations to MS Power BI by redesigning and structuring Key Risk Indicators (KRIs) metrics into interactive dashboards, enhancing data accessibility and decision-making for senior stakeholders
- Collaborated with business and IT teams to define data requirements, develop data models, and ensure seamless integration for real-time KRI metrics within Power BI
- Achieved annual saving of \$500k through enhanced reporting accuracy and enhancing risk mitigation strategies

Project: Risk Assessment Heatmap Dashboard

Macquarie Global Services, Power BI Developer

- Collaborated with stakeholders to gather, analyze, cleanse, and transform data from multiple sources, creating a dynamic risk assessment heatmap for enhanced risk visibility
- Automated risk heatmap reporting processes using MS Power BI, and Excel, assessing risk more efficiently and reducing manual effort by 30%
- Achieved annual savings of \$1M through process optimization and data driven risk management strategies

WORK HISTORY

Tilray Brands

Jun 2025 – Aug 2025

Intern – Data and Analytics | IT, Consumer Packaged Goods (CPG)

Canada

- Developed data workflows using KNIME, Python, and T-SQL, and built staging and production databases from scratch to streamline data extraction and loading, thereby reducing ETL overhead by 40%
- Developed semantic data models and designed demand planning dashboards in Power BI, enabling supply chain and planning teams to monitor raw material requirements in real time, resulting in a 50% improvement in resource planning efficiency
- Developed and configured dataflows in Microsoft Fabric using Dataflow Gen1 to optimize Power BI dashboard performance, reducing manual data processing time by 30%
- Designed and scheduled multiple Power Automate workflows to extract data from Power BI reports on a weekly basis, exporting results in CSV format to ensure data backup and compliance with data governance policies

Macquarie Global Services

May 2022 – Nov 2023

Operational Risk Manager | IT, Banking & Finance

India

- Built metrics and reports using Power BI that translated business needs into actionable insights by migrating data from MS Excel and visualizing key business Key Risk Indicators (KRIs), this resulted in a 50% reduction in overdue incidents reported

- Developed Python scripts to automate data collection and analyze data, resulting in a 40% reduction in manual data entry time and supporting business strategy growth initiatives by increasing operational efficiency
- Built a Power BI executive dashboard for the board audit committee, enhancing visibility into data quality issues by using financial analysis, which led to a 50% reduction in data quality issues through advanced data analytics
- Prepared documentation of new and existing controls, overseeing the reporting of incidents and issues in IBM Open Pages and Jira portals, resulting in a 30% improvement in incident tracking and control documentation

Moody's Analytics

Sep 2015 – Apr 2022

QA Engineer | IT, Banking & Finance

India

- Automated the regression testing process by integrating Python-based test cases within Jenkins (CI/CD) pipelines to validate data, reducing manual intervention and achieving a 25% increase in overall efficiency
- Developed technical solutions for distributed platforms to conduct manual and functional testing by using Python scripts and SQL queries resulting in a 20% increase in QA process efficiency
- Rewrote SQL queries to collect and organize data across multiple departments, implementing a centralized data management system that improved data access and reporting efficiency by 35% for Power BI reporting purposes
- Collaborated with cross-functional teams to gather business requirements, root cause analysis, prioritize user stories according to Agile methodology resulting in a 30% improvement in project delivery efficiency

Newgen Software Technologies

Dec 2011 – Aug 2015

Senior Programmer | IT, Banking & Finance

India

- Built SSIS data pipelines to extract the data from the Oracle data warehouse, integrate millions of records, and ingest data into an MS SQL Server using PL/SQL preprocessing logic, resulting in a 40% reduction in data transformation
- Conducted thorough testing of end-to-end ETL SSIS data mappings, monitoring preprocessing logic by using SQL automated scripts, resulting in a 20% improvement in the ETL testing process
- Deployed and debugged SSIS data frameworks at the client's environment in Oman, by collaborating closely with stakeholders, resulting in a 50% reduction in report generation
- Led Oracle practical SQL coding training to 50+ developers and testers by facilitating workshops, code review discussions, and providing personalized coaching, resulting in a 35% faster integration into mainstream roles

WNS Global Services

Mar 2010 – Jul 2011

Customer Service Associate | IT, Telecom

India

- Self-driven in resolving production support tickets and actively troubleshoot technical issues by coordinating with Orange Business Services and applying networking-related knowledge, resulting in a 15% faster issue resolution
- Developed functional and technical documentation for all business change requests using MS Word and Confluence, which facilitated the preparation of 50 business requirements for the troubleshooting team
- Excelled at building lasting professional relationships by facilitating teamwork activities and process training for new joiners, providing IT support and demonstrated collaboration skills during onboarding, resulting in a 30% increase in new hire productivity

VOLUNTEER WORK EXPERIENCE

Save The Water

Sep 2024 – Present

Technology Associate: Web Analytics | IT, Environmental Services

Canada

- Developed monthly reports in Google Looker to analyze website traffic KPIs (clicks, impressions), providing actionable insights to the marketing team, resulting in improved alignment and a 20% increase in user engagement
- Extracted data from GA4 into Google Sheets on an ad-hoc basis, customizing dimensions and metrics to support web flow migration, resulting in a seamless data transition and enhanced tracking accuracy
- Participated in agile meetings and supported Looker dashboard enhancements, resulting in a 10% improvement in project delivery timelines

EDUCATION

- **Ontario Graduate Certificate, Business Insights and Analytics**

Jan 2024 – Sep 2025

Humber Polytechnic, Etobicoke, ON | GPA: 3.6 (Dean's list)

- **Master of Computer Application**

Aug 2006 – Sep 2009

Maharshi Dayanand University, India | GPA: 3.21

- **Bachelor of Computer Applications**

Jul 2003 – Jun 2006

Guru Gobind Singh Indraprastha University, India | GPA: 3.46

CERTIFICATION AND TRAINING

- MS Power BI Dashboard Training in a Day at Humber College

Apr 2024
